Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the prior art teaches the use of an objective lens system for a zoom lens of a camera. The prior art teaches the use of placing an optical element located within a relay lens group on an optical axis of the zoom lens. Furthermore, the prior art teaches coating the optical element surface forming an interference filter causing a modification of the light spectrum. However, the prior art does not teach or fairly suggest locating the optical element at a position sandwiched between two adjacent lens elements of a substantially similar diameter located within the relay lens group that do not move with respect to each other.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
